

When Jana Barcus first came to the farm to access my horse, I wasn't expecting miracles. I figured it was a great selling strategy to get you to buy Purina. Not being brand loyal at the time, I figured why not, what would be the harm. Leo, at age 29 was in failing health, and I figured it was just his age. He had lived a long happy life, and some horses just don't live to 30yrs old...right? When Jana arrived, he was lethargic had diarrhea and was very thin. Again, I thought it was his age that was causing all this, not his feed or lack of feed. She immediately, set into motion an emergency feeding program. She highly suggested we coordinate this with a physical exam from our vet. After getting the go ahead the next day from our vet, Dr. Schwab & Palmer, we began a gradual feeding program which included Purina Senior Feed. Over the course of the next 3 weeks we increased the number of pounds he was given until we set a maintenance amount for the length of the trial period. In a matter of a week, you could see a difference in his energy level. His eyes were more alert his head held just a little higher, the diarrhea subsided as well. Since he has so few teeth left, eating hay was very difficult, and as Jana explained, with the Senior feed, he no longer had to have the hay....he was receiving everything he needed within the food. Week by week, it was as if he was coming back to life. I would never have believed a feed could have made the difference between life and death, but Leo, the former high energy hunter-jumper, was once again emerging. After the feed trial period was over, the physical and emotional difference in Leo is no less a miracle. He runs at full speed around the paddock. He bucks, whinnies and is a living testimony that the right feed and the expertise of a knowledgeable Purina representative, like Jana Barcus can truly be the difference between life and death for your beloved companion. Leo is proof positive that it is never too late to try something different in order to keep your companion with you a little bit longer. Thank you Jana and Purina for bringing my Leo back to me!

Sincerely, Susan Willis
